Exp 12 (b) Chat client-server using TCP sockets

AIM:

To implement a simple that chat client-server application using TCP sockets.

ALGORITHM: server

1. Create a TCP socket
2. Bind & Listen for a client
3. Accept the connection
4. Receive a message from the client
5. Send a reply to client.
6. close the connection

Client

1. Create a TCP socket
2. Connect to the server
3. Send a message
4. Receive the server's reply
5. Display reply
6. Close connection

Code - server

```
import socket
s.socket.socket()
s= connect(("localhost", 5000))
while True:
    msg = input("client:")
    s.send(msg.encode())
    if msg == "bye": break
    Print("client", msg)
    C.send(input("server:").encode())
C.close()
S.close()
```

Input:

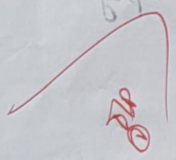

Client: Hello

Server: Hi

Output:

Client: Hello

Server: Hi

Code - client

```
import socket
s = socket.socket()
s = connect(("localhost", 5000))
while True:
    msg = input("Client: ")
    s.send(msg.encode())
    if msg == "bye": break
    print("Server:", s.recv(1024.decode())
s.close()
```

Result:

Thus the chat client server was successfully implemented
