Ex.No: 4 LAN CONNECTIONS

AIM:

To setup and configure a LAN (Local Area Network) using a Switch and Ethernet cables in your lab.

LAN:

LAN refers to network that connects devices within a limited area. It enables users to share resources, including data.

~~Set up a LAN~~

Procedure:

1. Plan and design an appropriate network topology
2. You can take 4 computers, a switch with 8, 16, 24 ports
3. Connect your computers to network switch via an Ethernet cable
4. Assign IP address to your PCs
   (1) Log on to client computer as Administrative or as owner
   (2) Click Network and Internet Connections
   (3) Right click Local Area / Ethernet.
5. Configure network switch
6. Check the connectivity b/w switch & other machine by using ping

7. Select a folder → go to prop's → click sharing tab → share it with everyone on the same LAN.

8. Try to access the shared folder from others computers of network

Result: Successfully configured a LAN using a switch, assigned IP address to all devices, verified connecti
